

Dolphin Plastics & Packaging Environmental Policy

Dolphin Plastics and Packaging recognizes that concern for the environment is fundamental to the way in which it conducts business; and is committed to promoting awareness and a responsible attitude amongst its employees.

Dolphin Plastics and Packaging incorporates a variety of different environmental management systems to allow the business to operate and perform everyday business tasks and duties with minimal environmental impacts.

The Dolphin Plastics and Packaging Management Team works closely with subcontractors, delivery drivers, suppliers and employees to ensure all areas of the business operate in an environmentally responsible manner.

Dolphin Plastics and Packaging is committed to:

1. Comply with legal requirements, including Codes of Practice and other guidelines; obtain licenses and other authorizations as required in order to comply with appropriate regulations.
2. Make efficient use of energy and natural resources.
3. Minimize waste and where practicable, ensure that waste products are recycled.
4. Re-use recycled material to manufacture more environmentally friendly products. Use of Degradable additives to ensure shorter and more environmentally safe breakdown period in landfill.
5. Restrict the use of packaging to a minimum and where practicable, maximize the use of recycled materials.
6. Place controls in the workplace for the regulation of water, air and noise pollution by the best available techniques, not entailing excessive cost.
7. Encourage the efficient and economical use of transport.
8. Maintain the condition and appearance of the company's premises.
9. Develop and provide products and services that help to conserve energy resources and; have no adverse effect on the environment.
10. Promote awareness amongst all employees of company environmental policy and ensure the co-operation in implementing these standards and procedures.
11. Encourage suppliers and customers to increase their awareness of, and improve environmental standards.
12. Regularly review our environmental standard and procedures, and strive for continuous improvement in our performance, towards a standard which is greater than the mere regulatory compliance.
